

1.1.14. Deterministic Model

A model whose outputs are not probabilities or probability distributions; that is, they do not quantify uncertainty.

1.1.15. Semi quantitative Methods

Methods that are based on the ability or need to quantify either the likelihood or the consequence of a fire event or events.

1.1.16. Scenario Cluster

A group of scenarios having some, but not all, defining characteristics in common.

1.1.17. Stakeholder

Any individual, group, or organization that might affect, be affected by, or perceive itself to be affected by the risk.

1.1.18. Validation

The process of determining the correctness of the assumptions and governing equations implemented in a method.
