

**Table 13.9.: Requirements for Fuel Dispensing Facilities**

ITEM	REQUIREMENTS
<b>7. FUEL DISPENSING SYSTEMS</b>	<b><u>3. DISPENSING HOSE</u></b>
	<ul style="list-style-type: none"> <li>i. Hose assemblies shall be approved and listed for fuel dispensing.</li> <li>ii. Hose length at automotive motor fuel dispensing facilities shall not exceed 5.5 m.</li> <li>iii. Where hose length at marine motor fuel dispensing facilities exceeds 5.5 m, the hose shall be secured so as to protect it from damage.</li> <li>iv. A listed emergency breakaway device designed to retain liquid on both sides of the breakaway point shall be installed on each hose dispensing Class I and II liquids, as per manufacturer's instructions and specifications.</li> </ul>
	<b><u>4. FUEL DELIVERY NOZZLES</u></b>
	<ul style="list-style-type: none"> <li>i. A listed, automatic-closing-type hose nozzle valve, with or without latch-open device, shall be provided on island-type dispensing devices used to dispense Class I liquids.</li> <li>ii. At any installation where the normal flow of product may be stopped other than by the hose nozzle valve, the system shall include listed equipment with a feature that causes or requires the closing of the hose nozzle valve before product flow can be resumed or before the hose nozzle valve can be replaced in its normal position in the dispenser or the hose nozzle valve shall not be equipped with a latch-open device.</li> <li>iii. Dispensing nozzles used at marine motor fuel dispensing facilities shall be of the automatic-closing type without a latch-open device.</li> </ul>
	<b><u>5. FUEL DELIVERY NOZZLES</u></b>
	<ul style="list-style-type: none"> <li>i. Fuel dispensing systems shall be provided with one or more clearly identified emergency shutoff devices or electrical disconnects. Such devices or disconnects shall be installed in approved locations but not less than 6 m or more than 30 m from the fuel dispensing devices that they serve.</li> </ul>
