

1.6. Water Spray Systems

1.6.12. Pilot Sprinkler

An automatic sprinkler or thermostatic fixed temperature release device used as a detector to pneumatically or hydraulically release the system actuation valve.

1.6.13. Fire Area

An area that is physically separated from other areas by space, barriers, walls, or other means in order to contain fire within that area.

1.6.14. Impingement

The striking of a protected surface by water droplets issuing directly from a water spray nozzle.
