

1.2. During Construction

1.2.1. Under Construction

Any building, structure, equipment that is being built or installed or altered or being demolished and is not ready to occupy or use, is defined as 'Under Construction'.

1.2.2. Temporary

Duration of six months (180 days).

1.2.3. Hot Work

Work involving burning, welding, or a similar operation that is capable of initiating fires or explosions.

1.2.4. Thermal Spraying

A group of welding or allied processes in which finely divided metallic or nonmetallic materials are deposited in a molten or semi molten condition to form a coating. The coating material shall be permitted to be in the form of a powder, a ceramic rod, a wire, or molten materials.

1.2.5. Thermal Welding

A welding process that produces coalescence of metals by heating them with super-heated liquid metal resulting from a chemical reaction between a metal oxide and aluminum, with or without the application of pressure. Filler metal, where used, is obtained from the liquid metal.

1.2.6. Torch –Applied Roofing System

A bituminous roofing system using membranes that are adhered by heating with a torch and melting an asphalt backcoating instead of mopping hot asphalt for adhesion.

1.2.7. Thermit Welding

Thermite welding (TW), or exothermic or thermit welding, is a welding that employs molten metal to permanently join the conductors.
