

In this Chapter:

- ➔ Fire access road specifications.
- ➔ Fire fighters access to and inside buildings.
- ➔ Fire boat access and docking
- ➔ Fire apparatus specifications.
- ➔ Fire station design guidelines

Intent of the Chapter:

- To ensure Civil Defence and their firefighting trucks, vehicles and fireboats have approved accessway with desired clear dimensions and load carrying capacities to developments, buildings and gated subdivisions.
- To ensure proper access to buildings and fire and Life Safety equipment are available for fire fighters.
- To ensure sufficient water supply is available through fixed firefighting systems.
